EXECUTIVE SUMMARY

Senior Full Stack Developer & Team Lead with 9+ years of experience building scalable web, mobile, cloud-native, and AI-powered applications. Specialized in Python, Node.js, and PHP (Laravel), along with modern frontend frameworks such as React.js, Next.js, TypeScript, and Tailwind CSS, delivering high-performance, user-centric solutions. Strong expertise in Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI agents, and chatbot development using technologies such as OpenAI, LangChain, LangGraph, and vector databases. Experienced in designing and developing RESTful APIs, microservices, and enterprise-grade backend systems, while optimizing databases including PostgreSQL, MongoDB, Redis, and Elasticsearch for scalability and performance. Proven track record of leading remote development teams, managing end-to-end project delivery, and implementing cloud-native architectures using AWS, Docker, Kubernetes, and CI/CD pipelines. Passionate about building intelligent, secure, and production-ready systems with a strong focus on clean architecture, innovation, automation, and business-driven outcomes.

TECHNICAL EXPERTISE

Frontend Development:

JavaScript (ES6+), TypeScript, React.js, Next.js, React Native, Angular, HTML5, CSS3, Tailwind CSS, Material UI, Redux, Responsive UI/UX, Single Page Applications (SPA)

Backend Development:

Node.js (Express.js, NestJS), Python (Django, FastAPI, Flask), PHP (Laravel, Symfony), RESTful APIs, GraphQL, WebSockets, Real-time Systems

AI, Generative AI & Machine Learning:

OpenAI API, LangChain, LlamaIndex, Hugging Face, TensorFlow, PyTorch, NLP, LLM Integration, RAG (Retrieval-Augmented Generation), Vector Databases (Pinecone, FAISS, Weaviate), Prompt Engineering, Chatbot Development, Data Preprocessing, Model Fine-tuning, AI-driven Automation

Databases:

PostgreSQL, MongoDB, Firebase, Redis, Elasticsearch

Cloud & DevOps:

AWS (EC2, S3, Lambda), Docker, Kubernetes, Nginx, PM2, CI/CD Pipelines (GitHub Actions, GitLab CI), Databricks, Model Deployment, Auto Scaling, Monitoring & Optimization

Frameworks & Libraries:

FastAPI, Django, React.js, Next.js, Express.js, TensorFlow, PyTorch, LangChain, LlamaIndex, Redux, Tailwind CSS, Material UI

Testing & QA:

Jest, Mocha, Cypress, Postman, Unit Testing, Integration Testing, End-to-End Testing, Automated QA Pipelines

UI/UX Collaboration:

Figma, Adobe XD, Wireframing, Prototyping, Design Integration, Usability Testing

Tools & Version Control:

Git, GitHub, GitLab, Bitbucket, Jira, Trello, Slack

AI Developer Tools:

Cursor, GitHub Copilot, Gravity AI, Lovable AI

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

03/2025 – Present

Linked Matrix

- Designed and developed scalable web applications using Laravel, Python, React.js, Next.js, and Vue.js, delivering high-performance and user-centric solutions.
- Built and integrated AI-powered features, LLM applications, chatbots, and automation workflows using OpenAI, LangChain, and vector databases.
- Architected and maintained RESTful APIs, microservices, and enterprise-grade backend systems, ensuring scalability, security, and reliability.
- Designed, optimized, and managed MySQL, PostgreSQL, MongoDB, Redis, and Elasticsearch databases to improve performance and data integrity.
- Implemented cloud-native deployments, Docker containerization, Kubernetes orchestration, and CI/CD pipelines on AWS for efficient software delivery.
- Collaborated with cross-functional teams, mentored developers, and led end-to-end project execution from requirements gathering to deployment and ongoing maintenance.

Senior Full Stack Developer & Team Lead

04/2023 – 02/2025

HRDRV

- Led the design, development, and delivery of scalable web, mobile, and cloud-native applications using Laravel, React.js, React Native, Vue.js, and Python.
- Managed and mentored remote development teams, conducting code reviews, technical planning, task allocation, and performance coaching to ensure high-quality deliverables.
- Architected clean, maintainable, and scalable software solutions following best practices, design patterns, and modern development standards.
- Developed and integrated RESTful APIs, third-party services, payment gateways, cloud platforms, and AI-powered features to enhance product capabilities.
- Implemented CI/CD pipelines, Docker-based deployments, cloud infrastructure, and performance optimization strategies to improve reliability and scalability.
- Collaborated closely with stakeholders throughout the project lifecycle, overseeing requirements analysis, solution architecture, development, testing, deployment, and ongoing support.

Senior Full Stack Developer

06/2020 – 03/2023

FiveRiver Technologies

- Architected and developed scalable full-stack web and mobile applications using Laravel, Vue.js, React.js, React Native, and Python, following clean architecture and coding best practices.
- Designed and implemented RESTful APIs, microservices, and third-party integrations, ensuring high performance, security, and maintainability.
- Built and integrated AI-powered solutions, LLM-based features, chatbots, and automation workflows to enhance user experience and business efficiency.
- Optimized and managed MySQL, PostgreSQL, MongoDB, Redis, and Elasticsearch databases, improving application performance, scalability, and data reliability.
- Deployed and maintained applications on cloud platforms using AWS, Docker, Kubernetes, and CI/CD pipelines, ensuring reliable and efficient software delivery.
- Led cross-functional and remote development teams, overseeing system architecture, project planning, code reviews, deployment processes, and end-to-end product delivery.

Full Stack Developer

08/2017 – 05/2020

sky soft

- Developed and maintained scalable web and mobile applications using Laravel, Vue.js, React.js, and React Native, delivering responsive, high-performance, and user-friendly experiences.
- Designed and implemented RESTful APIs, backend services, and third-party integrations, ensuring secure and efficient communication between systems.
- Built and integrated AI/ML-powered features, intelligent automation workflows, and data-driven solutions to improve application functionality and user engagement.
- Designed, optimized, and managed MySQL, PostgreSQL, and MongoDB databases, focusing on performance, scalability, security, and data integrity.

- Deployed and maintained applications using modern development practices, including cloud services, Docker, version control, and CI/CD pipelines for streamlined releases.
- Collaborated with stakeholders and development teams to deliver end-to-end solutions, contributing to system architecture, project planning, code reviews, testing, deployment, and ongoing support.

PROJECTS

Enterprise AI-Powered Customer Support Platform (Team Lead)

- Led the end-to-end architecture, development, and delivery of an enterprise-grade AI-powered customer support platform, serving high-volume customer interactions across multiple business domains.
- Designed and implemented a scalable microservices architecture using React, Node.js, and FastAPI, enabling high availability, maintainability, and seamless system integration.
- Developed advanced RAG (Retrieval-Augmented Generation) pipelines with vector databases to provide accurate, context-aware, and intelligent AI responses powered by Large Language Models.
- Implemented secure authentication, role-based access control (RBAC), conversation management, analytics dashboards, and performance monitoring to enhance security and operational visibility.
- Led a cross-functional development team through project planning, code reviews, mentoring, and deployment, ensuring timely delivery of scalable, production-ready solutions.

Tech Stack: React.js, Node.js, Python (FastAPI), OpenAI API, LangChain, Pinecone, PostgreSQL, Redis, Docker, AWS.

Smart Recruitment & ATS Platform

- Architected and developed an AI-powered Applicant Tracking System (ATS) that streamlined recruitment workflows through intelligent resume screening, candidate evaluation, and hiring automation.
- Built responsive and feature-rich React.js dashboards for recruiters and hiring managers, providing real-time visibility into candidate pipelines, job postings, and recruitment analytics.
- Implemented advanced NLP and deep learning models using Hugging Face to enable semantic resume parsing, job-candidate matching, and skill-based candidate recommendations.
- Automated candidate ranking, shortlisting, reporting, and workflow management, significantly improving recruitment efficiency and reducing manual screening efforts.
- Led system architecture, code reviews, DevOps processes, and deployment pipelines, ensuring scalability, security, performance, and reliable production releases.

Tech Stack: React.js, Django, Python, NLP, Hugging Face Transformers, PostgreSQL, Docker, REST APIs, CI/CD.

Sales Forecasting & Business Intelligence System

- Designed and developed a scalable predictive analytics and business intelligence platform that enabled organizations to forecast sales trends, optimize decision-making, and improve revenue planning.
- Built high-performance RESTful APIs and FastAPI services to deliver real-time machine learning predictions and analytical insights to business users and external systems.
- Implemented end-to-end data pipelines for data ingestion, preprocessing, feature engineering, model training, evaluation, and continuous performance monitoring.
- Developed interactive React.js dashboards featuring sales forecasts, KPI tracking, trend analysis, and data visualizations to support strategic business decisions.
- Mentored junior developers and collaborated with cross-functional teams to integrate machine learning models into production environments while optimizing system performance, scalability, and reliability.

Tech Stack: React.js, Node.js, Python, FastAPI, Scikit-learn, MongoDB, Redis, REST APIs, Docker, CI/CD.

Intelligent Document Management & Workflow Automation

- Led the design and development of an enterprise-grade Document Management and Workflow Automation Platform, streamlining document handling, approval processes, and operational workflows.
- Integrated advanced OCR, NLP, and Large Language Models (LLMs) to automatically extract, classify, validate, and summarize unstructured documents with high accuracy.
- Developed secure and scalable RESTful APIs using Laravel, implementing role-based access control, document lifecycle management, and enterprise-level security standards.
- Automated document processing, classification, validation, and workflow routing, significantly reducing manual effort, processing time, and operational costs.
- Coordinated cross-functional teams across frontend, backend, and AI development, ensuring successful delivery of scalable, production-ready solutions from architecture to deployment.

Tech Stack: React.js, Laravel, Python, OCR, NLP, OpenAI API, MySQL, REST APIs, Docker, AWS.

Automated Email Classification & Response Assistant

- Designed and developed an AI-powered email management platform that automatically categorized incoming emails into support, sales, billing, urgent, spam, and other business-specific classifications.

- Implemented advanced NLP pipelines, text preprocessing, feature engineering, and machine learning models to improve email classification accuracy and streamline communication workflows.
- Integrated Large Language Models (LLMs) to generate intelligent, context-aware draft responses, enabling faster handling of customer inquiries and repetitive communication tasks.
- Automated email triaging, prioritization, and response generation, significantly reducing manual workload, improving response times, and enhancing operational efficiency.
- Developed scalable RESTful APIs and FastAPI services for seamless integration with email platforms, CRM systems, and third-party business applications.

Tech Stack: Python, FastAPI, NLP, Scikit-learn, OpenAI API, REST APIs, Machine Learning, Docker, CI/CD.

Smart Job Application Tracker & Analyzer

- Designed and developed a web-based job application management platform that enabled users to track, organize, and monitor applications across multiple job portals and recruitment channels.
- Implemented advanced NLP and AI-powered analysis to extract skills, qualifications, experience requirements, and key insights from job descriptions automatically.
- Built an intelligent **job-to-profile matching engine** that compared candidate profiles with job requirements, generating compatibility scores and personalized recommendations.
- Developed scalable RESTful APIs and backend services for application tracking, status management, notifications, reporting, and recruitment analytics.
- Enhanced job search efficiency by providing actionable insights, application performance metrics, and optimization recommendations to improve interview conversion and hiring success rates.

Tech Stack: Python, FastAPI, PostgreSQL, NLP, OpenAI API, REST APIs, Machine Learning, Docker, CI/CD.

CERTIFICATES

- Ai Certificate
- Database
- Master Python

EDUCATION

Bachelor of Science in Computer Science
University of Management and Technology

2015 – 2019
Lahore, Pakistan
